

## STAY CONNECTED TO YOUR VIDEOFIED SYSTEMS STAY CONNECTED TO YOUR CUSTOMERS

### FUNCTIONALITY OVERVIEW

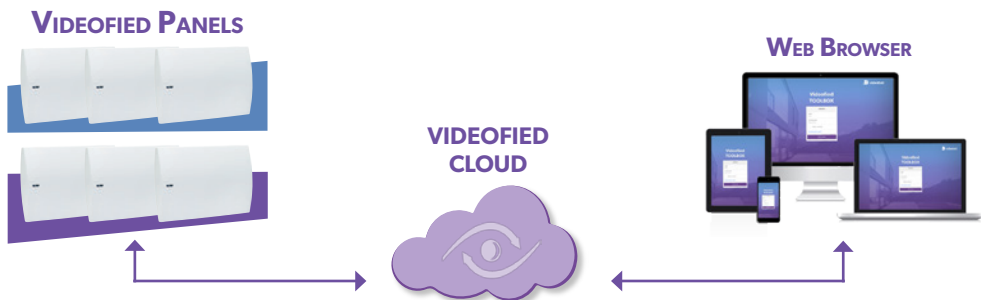

The Toolbox panel interface allows the interaction between the installer and the panel through the Videofied Cloud. The Toolbox can be used with any **web browser**.

Your panel configuration is synchronized with its virtual panel configuration in the Videofied Cloud. With the Toolbox you can modify that virtual configuration and manage remotely the maintenance of your **Videofied systems**.

### VIRTUAL MAINTENANCE

From the Toolbox, you can perform the following maintenance actions at any time:

- Take a picture from one of the installed cameras
- Bypass a detector
- Add or modify a badge or a code
- Remotely register a device to the system
- Check panel status
- Check device status

## AN INSTALLER TOOL

- A fast, easy and user friendly way to remotely access your Videofied systems parameters.
- An easy-to-use maintenance tool accessible from any connected computer, tablet or smartphone.
- A faster learning curve.

## ACCOUNT MANAGEMENT

The company's technical manager will use a TOOLBOX MANAGER ACCOUNT provided by Videofied. The MANAGER can create and manage other accounts.

## ERROR-FREE MAINTENANCE

- Missing and/or mandatory parameters highlighted
- Critical parameters can be masked by the MANAGER
- Toolbox modifications, history, log
