

VIDEOFIED, ALARMS SYSTEMS FOR **RESIDENTIAL SMALL BUSINESS ENTERPRISES**

VIDEOFIED® , **APPRECIATE YOUR SECURITY!**

Videofied alarm systems have revolutionized the security market over the last ten years. Our new product generation brings you colour video verification.

Upon an intrusion, MotionViewer cameras take a ten second video. The video is immediately transmitted to your Alarm Receiving Centre (ARC).

The operator at the ARC watches the video and can instigate a fast response in the case of a video verified intrusion.

OUR ADVANTAGES

A simple installation

No wiring and programming is easy thanks to the radio keypad. No programming tool is needed.

A 100% Bi-directional radio

Advanced wireless radio technology. The remote keyfob for example, confirms directly with an acoustic beep arm and disarm actions. So you can arm or disarm your alarm system from your car and receive confirmation.

A full range of devices

The Videofied range offers a large choice of radio devices, keypads and badge readers for arming, indoor and outdoor sirens as an acoustic deterrent, PIR detectors for intrusion, all completely wireless.

WIRELESS VIDEO SECURITY

- The most advanced security system with colour video verification
- Bi-directional radio range in 868 MHz European operating frequency
- GSM/GPRS/WIFI/Ethernet alarm transmission
- 4-years battery life

Connected products that give you peace of mind!

What is happening in my home ? Who is present? Did I arm my alarm system?

The smartphone application integrates multiple functions, accessed remotely to meet your needs: check the status, arm or disarm your system, take photos or videos, store your shots to view them later, temporarily disarm a room, etc...

With Videofied, be autonomous, Interactive, Connected ... and APPreciate your security!
